

EU CYBER RESILIENCE ACT (CRA)

Protect Technology Assets. Reduce Risk. Stay Competitive

New EU Cybersecurity Rules. Real Commercial Impact.

The EU Cyber Resilience Act (CRA) introduces mandatory cybersecurity requirements for products with digital elements sold into the EU.

From December 2027, products that don't meet CRA requirements cannot be legally placed on the EU market - putting revenue, customer contracts, and CE marking at risk.

Does This Affect You?

The CRA applies if you manufacture, supply, or integrate:

- ▶ Connected hardware or embedded systems
- ▶ Displays, compute modules, controllers, or smart devices
- ▶ Software or firmware used in connected products
- ▶ Components that form part of a digital system

If your product connects, communicates, or updates - CRA applies.

Why This Matters Commercially:

CRA is not just a compliance issue, it impacts:

- ▶ EU market access & CE marking
- ▶ Customer audits and procurement decisions
- ▶ Product lifecycle costs and support commitments
- ▶ Supply-chain responsibility and liability
- ▶ Time-to-market for new designs

Non-compliance can lead to market withdrawal and significant financial penalties.

Key Dates to Know:

Date	Key Milestones
10th December 2024	CRA came into force in the EU
1st August 2025	CRA device security requirements on OEM
11th September 2026	First reporting obligations (e.g. incidents & vulnerabilities)
11th December 2027	Full CRA compliance and applicability begins for all relevant products

How RDS Supports CRA Ready Products:

RDS helps customers reduce risk and complexity by:

- ▶ Understanding what CRA means for your specific products
- ▶ Selecting and supplying compliant hardware and software
- ▶ Designing security-ready platforms from the outset
- ▶ Supporting documentation and lifecycle considerations

Whether you are designing new products, reviewing existing platforms, or managing EU customer requirements, we help turn CRA from a risk into a managed, commercial advantage.

Lets Talk About Your Products

If you want to understand how CRA impacts your roadmap, supply chain, or customers, speak to our team.
